INTELLIGENT BATTERY CHARGERS 5 AMP & 10 AMP, 12 VOLT & 24 VOLT

The DSE9400 series is a range of intelligent battery chargers that can be programmed for different charging curves to maximise the life of the battery.

The chargers do not include any moving parts to give added durability and reliability. They continue to operate during engine running.

The DSE9400 series of intelligent battery chargers are programmed using the user-friendly DSE Configuration Suite PC software. The chargers can be either DIN rail or chassis mounted, using the fixing holes that are built into the case. The charger's stylish design includes three coloured LEDs to indicate charging status and fault conditions.

Multiple modules can be linked together to provide a larger current output.

This range of chargers features a lithium iron charging profile to support lithium batteries.
